

L3AI Enterprise Roadshow

L3AI 企业级路演

AI-native intelligence for Web3 decisions, built around clarity, wallet awareness and public-safe trust boundaries.

面向 Web3 决策的 AI 原生智能平台，以清晰、钱包感知和公开安全边界为核心。

Public-safe

Roadshow

Bilingual

L3AI

AI-native intelligence for Web3 decisions

Public recordings, verified assets and launch-ready resources.

[xiaohongshu0215-afk.github.io/l3ai-public-site](https://github.com/xiaohongshu0215-afk/l3ai-public-site)

Web3 users do not need more noise. They need context they can trust.

Web3 用户不缺信息，缺的是可信语境。

- Wallet activity, market context, product modules and community updates live across disconnected surfaces.
- AI can help organize that context, but only when the product keeps uncertainty and risk visible.

By the end of this deck: understand why L3AI should be judged as a clarity infrastructure layer, not a hype-driven trading product.

The user problem is understanding before action.

核心问题是行动前的理解。

信号分散

Fragmented signals

Market, wallet and product information arrives without a shared structure.

风险语言不清晰

Unclear risk language

Many journeys hide uncertainty behind promotional copy.

评审路径薄弱

Weak review paths

Decks, sites and demos often do not map back to real product proof.

L3AI turns fragmented Web3 context into a guided product journey.

L3AI 将碎片化语境组织成清晰产品路径。

- AI-assisted explanation supports clarity, not certainty.
- Wallet-aware education helps users understand access and activity without exposing private data.
- Public resources keep the deck, whitepaper, video and proof assets connected to the live site.

one reviewer-friendly path. The current package now includes authentic browser screenshots and recordings captured from the public site.

[Open showcase](#)[AI Quant](#)[Wallet Journey](#)[Recording pack](#)

PREMIUM ASSETS 030

Authentic product recordings are now part of the launch package.

The recording pack captures the current public website flows for homepage discovery, AI Quant, wallet education, business model review, Resources and Contact / Partner routing. It uses only public site content and keeps private implementation details out of the media layer.

[Watch homepage flow](#)[Open asset catalogue](#)[Open manifest](#)

Public-safe visual asset. No private source, credentials or real user data.

Five product layers create the L3AI experience.

五个产品层构成 L3AI 体验。

01 AI market context	AI 市场语境	Current
02 Wallet-aware education	钱包感知教育	Current
03 Product resources	产品资料	Current
04 Community learning	社区学习	In Progress
05 Ecosystem intelligence	生态智能	Planned

Status markers are part of the product story: live surfaces, active production and roadmap items are never blended.

The live public site is now the first proof surface.

公开官网已经成为第一证明界面。

- The homepage opens with product evidence and clear action paths.
- Resources, recordings and manifests are available from public URLs.
- The site avoids private source exposure and unsupported outcome claims.

One reviewer-friendly path. The current package now includes authentic browser screenshots and recordings captured from the public site.

PREMIUM ASSETS 030

Authentic product recordings are now part of the launch package.

The recording pack captures the current public website flows for homepage discovery, AI Quant, wallet education, business model review, Resources and Contact / Partner routing. It uses only public site content and keeps private implementation details out of the media layer.

[Watch homepage flow](#)[Open asset catalogue](#)[Open manifest](#)

Public-safe visual asset. No private source, credentials or real user data.

AI Quant is framed as explanation before action.

AI Quant 被定位为行动前解释。

Current

- Collect public context.
- Structure signals and assumptions.
- Keep risk notes and uncertainty visible.
- Route users to review, not automated trading.

PRODUCT MODULES

What this page helps the visitor understand.

Input

Public market themes, protocol context, product documentation and launch materials.

Model role

Explain, compare, summarize and structure rather than guarantee performance.

Reviewer controls

Risk notes, scenario language, public FAQ and unsupported-claim filters.

Output

Educational context that can hand off to product pages, whitepaper or deck.

WALKTHROUGH

From first context to next step.

01 Collect public context

Gather public-facing information only.

02 Structure signals

Separate observation, assumption, scenario and uncertainty.

03 Review boundary

Remove advice, guaranteed outcome and live-execution language.

04 Hand off

Route visitors to business model, roadmap or contact when appropriate.

Public-safe visual asset. No private source, credentials or real user data.

Wallet awareness stays educational and bounded.

钱包感知保持教育属性和边界。

Current

- The public journey explains wallet context without requesting signatures.
- Screenshots and recordings contain no real user balances or private wallet material.
- Conversion language stays calm and review-oriented.

PRODUCT MODULES

What this page helps the visitor understand.

Intent first

Start from the user goal instead of forcing a technical wallet action.

Context view

Explain product state in plain language before sensitive decisions.

Checkpoints

Make risk reminders and confirmation moments visible.

Record layer

Describe auditability at a high level without exposing raw account data.

WALKTHROUGH

From first context to next step.

01 Understand intent

Clarify what the visitor is trying to do.

02 Show context

Present wallet-aware state as product education.

03 Review risk

Keep confirmation and boundary notes visible.

04 Preserve records

Explain auditability without exposing private implementation details.

Public-safe visual asset. No private source, credentials or real user data.

The resource center connects every public launch asset.

资源中心连接全部公开发布资产。

Current

- Whitepaper, roadshow deck, video and social assets are organized in one place.
- Manifest files make asset inventory and versioning reviewable.
- Public-safe claims are easier to audit when assets are centralized.

Public-safe visual asset. No private source, credentials or real user data.

The visitor journey moves from discovery to qualified review.

访客路径从发现走向合格评审。

Different audiences need different proof, not different promises.

不同受众需要不同证明，而不是不同承诺。

Audience	What they need	Public route
Web3 users	Clear market and wallet context	Product overview, AI Quant, FAQ
Media	Approved language and assets	Resources, media kit, video
Partners	Trust boundary and collaboration fit	Use cases, contact path
Investors	Category logic and operating discipline	Roadshow deck, roadmap, model

The business model is a clarity loop, not a reward promise.

商业模式是清晰度闭环，不是收益承诺。

Revenue categories remain evidence-gated before numeric forecasts.

收入类别在形成数字预测前必须经过证据门禁。

Category	Possible value	Status
Subscription or access	Workspace, education or premium context surfaces	Planned
Enterprise review package	Partner, media or investor-ready material production	In Progress
Community programs	Education, events and ecosystem participation	Planned
Partner integrations	Approved ecosystem collaboration paths	Planned

The ecosystem map keeps product, content and trust in one view.

生态图把产品、内容和信任边界放在同一视图。

- AI market context and wallet education anchor the user experience.
- Public resources, media kit and business deck support review.
- Risk boundary remains visible across public materials.

L3AI ecosystem map

Product, content, trust and launch operations in one public surface.

Public-safe visual asset. No private source, credentials or real user data.

The asset engine turns source facts into controlled public materials.

资产引擎将事实来源转化为受控公开资料。

The video package supports the product story after the path is clear.

视频包在产品路径清晰后增强叙事。

Current

- 3-minute flagship promo asset with bilingual subtitles.
- Authentic public-site recordings for homepage, AI Quant, wallet, business model and resources.
- Human voice-over and paid-media trafficking remain optional external production steps.

Public-safe visual asset. No private source, credentials or real user data.

Distribution is prepared, while external execution stays approval-gated.

分发准备已完成，外部执行保持审批门禁。

Trust is built by saying what L3AI will not claim.

信任来自明确说明 L3AI 不会宣称什么。

Boundary

No guaranteed returns

No APY, yield, token price or trading certainty.

Privacy

No private-data exposure

No keys, signatures, balances or internal source.

Evidence

No fake traction

No user counts, partners or revenue without evidence.

AI

No AI certainty

AI supports explanation, not personal financial advice.

Security and red-team work are treated as gates, not slogans.

安全和红队工作是门禁，不是口号。

Boundary

Funds and settlement

Idempotency, replay and concurrency controls require evidence.

Privacy

Permissions

RBAC, admin actions and JWT boundaries remain review-critical.

Evidence

Queues and recovery

Retry, crash and backlog drills must be staged before production claims.

AI

Launch operations

Rollback owners, monitoring and evidence records must stay current.

Current, in-progress and planned capabilities are visibly separated.

当前、进行中和规划中能力必须清晰区分。

Current

- Public website
- Product pages
- Resources library
- Video package
- Recording assets

In Progress

- Enterprise roadshow deck
- Creative production sprint
- Approval evidence closure
- Advanced localization

Planned

- Authenticated product recordings
- Automated external publishing
- Advanced partner integrations
- AI growth system

Year 1 focuses on public trust, product clarity and controlled launch readiness.

第一年聚焦公开信任、产品清晰度和受控上线准备。

Current and In
Progress

Phase 1

Foundation

Public site, resources, deck, whitepaper and proof assets

Phase 2

Validation

QA, staging evidence, security and release approvals

Phase 3

Launch

Controlled public launch and partner review paths

Year 2 expands community learning and partner-grade workflows.

第二年扩展社区学习和伙伴级工作流。

Planned

Phase 1

Community

Learning programs, moderated content and onboarding paths

Phase 2

Partner workflow

Review packages, integrations and approved handoff paths

Phase 3

Localization

Deeper bilingual and regional content operations

Year 3 turns L3AI into a repeatable public intelligence operating system.

第三年将 L3AI 打造成可复用的公开智能运营系统。

Planned

Phase 1

Intelligence OS

Configurable content, review and evidence workflows

Phase 2

Ecosystem layer

Partner content and product education surfaces

Phase 3

Operational moat

Release governance, automation and safe distribution

Go-to-market starts with education before conversion.

市场进入从教育开始，而不是先转化。

Website

Product path and resource library

Content

Whitepaper, deck, video and FAQ

Community

Learning and discussion without hype

Partners

Qualified review and collaboration path

Partnerships should be qualified by fit, evidence and risk boundary.

合作应由契合度、证据和风险边界来判断。

Partner fit	L3AI provides	Gate
Media and education	Approved public language and explainers	Brand and claim review
Wallet or ecosystem	Wallet-aware education surface	Privacy and legal review
Enterprise reviewer	Roadshow, resource and proof package	Owner approval
Community operator	Learning journeys and safe content	Moderation review

The KPI model measures quality of understanding, not financial outcomes.

KPI 模型衡量理解质量，而不是财务结果。

Signal	Why it matters	Boundary
Resource engagement	Shows whether users can find approved materials	No investment inference
Product path completion	Shows clarity across overview, AI and wallet pages	No trading signal
FAQ and trust views	Shows risk-language visibility	No legal advice claim
Qualified contact	Shows partner or reviewer intent	No revenue forecast

L3AI differentiates through restraint, structure and proof.

L3AI 的差异化来自克制、结构和证明。

产品优先

Product-first

The live site and recordings carry the story before the deck does.

风险可见

Risk-aware

Boundaries are visible in the journey instead of hidden in footnotes.

生产可审计

Production-ready

Assets, manifests and QA records make public materials reviewable.

The next decision is to use L3AI as the controlled public story for launch review.

下一步决策是将 L3AI 作为受控公开叙事进入发布评审。

1. Approve this roadshow deck as the flagship presentation.
2. Confirm public-safe language with product, legal, security and release owners.
3. Use Resources as the single distribution point for deck, whitepaper, video and proof assets.
4. Keep external publish execution behind explicit release approval.

Next step

Use Resources as the single public handoff point.
