Press Summary

L3AI is an AI-native financial intelligence platform for Web3 users. It helps users understand market context, wallet activity, product modules, ecosystem information, and risk considerations through a clearer AI-assisted experience.

Company Boilerplate

L3AI brings AI-assisted market context, wallet-aware product experiences, risk-aware education, and community learning into one platform. Built for Web3 users, L3AI helps people organize fragmented information, understand product context, and approach digital-asset activity with greater clarity and more careful expectations.

Product Overview

L3AI is designed around five customer-facing layers:

- AI market context
- Wallet-aware product experience
- Plain-language product education
- Risk-aware user journey
- Community and ecosystem learning

Together, these layers help users review information with more structure before deciding how to participate.

Media Description

L3AI addresses a common challenge in Web3 finance: users can access large amounts of information, but the information is often fragmented, technical, or difficult to interpret. L3AI uses AI-assisted workflows and clear product education to help users understand what they are seeing, why it matters, and what risks should remain visible.

Approved Message Points

- L3AI focuses on clarity, context, and risk awareness.
- L3AI uses AI to organize and explain information, not to promise certainty.
- L3AI connects product education, wallet context, and community learning.
- L3AI avoids financial outcome guarantees and hype-driven product language.
