

L3AI makes Web3 easier to understand before people participate.

A customer-ready story about intelligence, participation and the next layer of Web3 products.

Customer takeaway

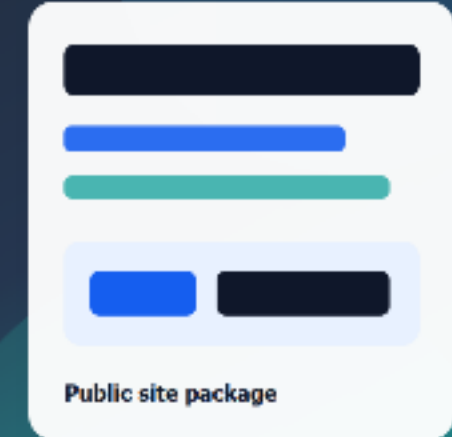

The first promise is clarity.

L3AI

AI-native intelligence
layer for Web3
decisions.

Product-led public journey
Authentic browser recordings
Verified launch assets

PREMIUM-ASSETS-030

Public site package

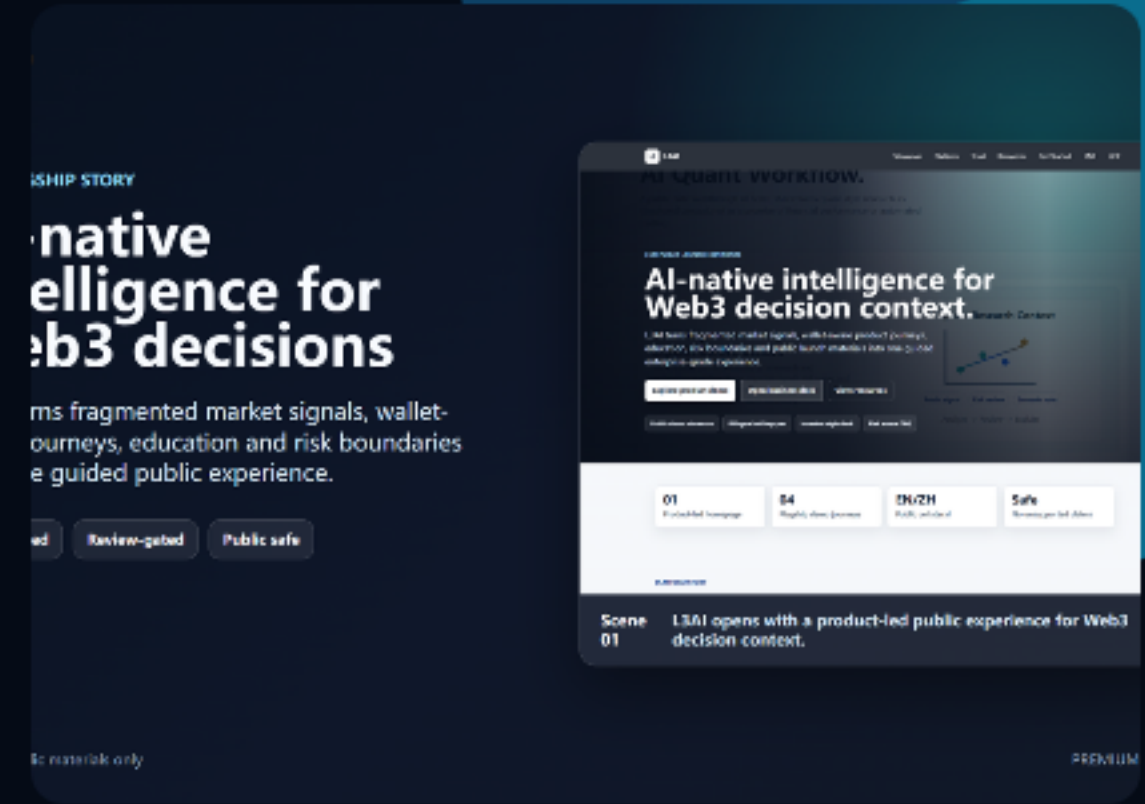

World and problem

Web3 has more signals than people can reasonably read.

Markets, wallets, products, communities and automation now move faster than a normal user can interpret.

Customer takeaway

The new scarcity is understanding.

World and problem

The next platform layer is not another dashboard.

Users need a guide that turns scattered information into a path they can follow.

Customer takeaway

A product should make the decision space legible.

SOLUTION

turns fragmented Web3 context into a
ed product journey.

碎片化语境组织成清晰产品路径。

isted explanation supports clarity, not
y.

s-aware education helps users understand
nd activity without exposing private data.

resources keep the deck, whitepaper,
nd proof assets connected to the live site.

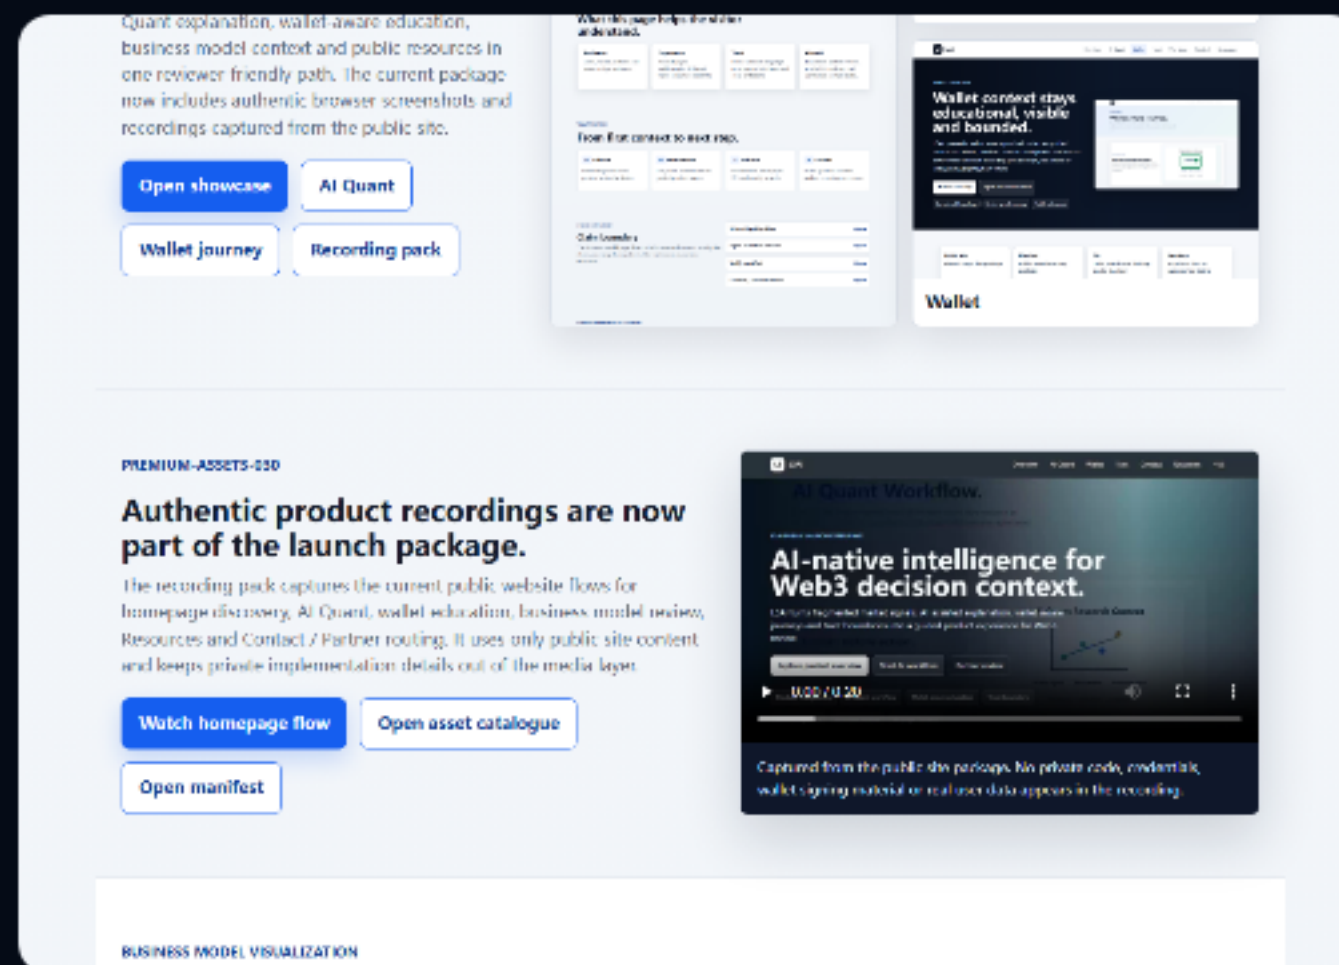

Pub-level virtual assets. No private source, on-chain or real user data.

World and problem

L3AI is built for the moment before action.

It helps users learn what they are seeing, review context and choose their next step with more confidence.

Customer takeaway

The product starts before the click.

The journey begins with a simple sequence.

Learn, review, compare, participate and return. L3AI turns that loop into a repeatable experience.

Learn

Review

Compare

Participate

Return

Customer takeaway

Participation works better when the path is visible.

One platform connects intelligence, wallet context and community learning.

The pieces are easier to trust when they are part of one system.

AI Quant

Compute

Wallet

Customer takeaway

L3AI is a connected experience, not a folder of tools.

AI Quant turns market noise into a readable context layer.

Instead of asking users to chase every signal, L3AI organizes what matters into explainable scenarios.

Customer takeaway

The user sees context before conclusion.

PRODUCT MODULES

What this page helps the visitor understand.

Input

Public market themes, protocol context, product documentation and launch materials.

Model role

Explain, compare, summarize and structure rather than guarantee performance.

Reviewer controls

Risk notes, scenario language, public FAQ and unsupported claim filters.

Output

Educational context that can hand off to product pages, whitepaper or deck.

WALKTHROUGH

From first context to next step.

01 Collect public context

Gather public facing information only.

02 Structure signals

Separate observation, assumption, scenario and uncertainty.

03 Review boundary

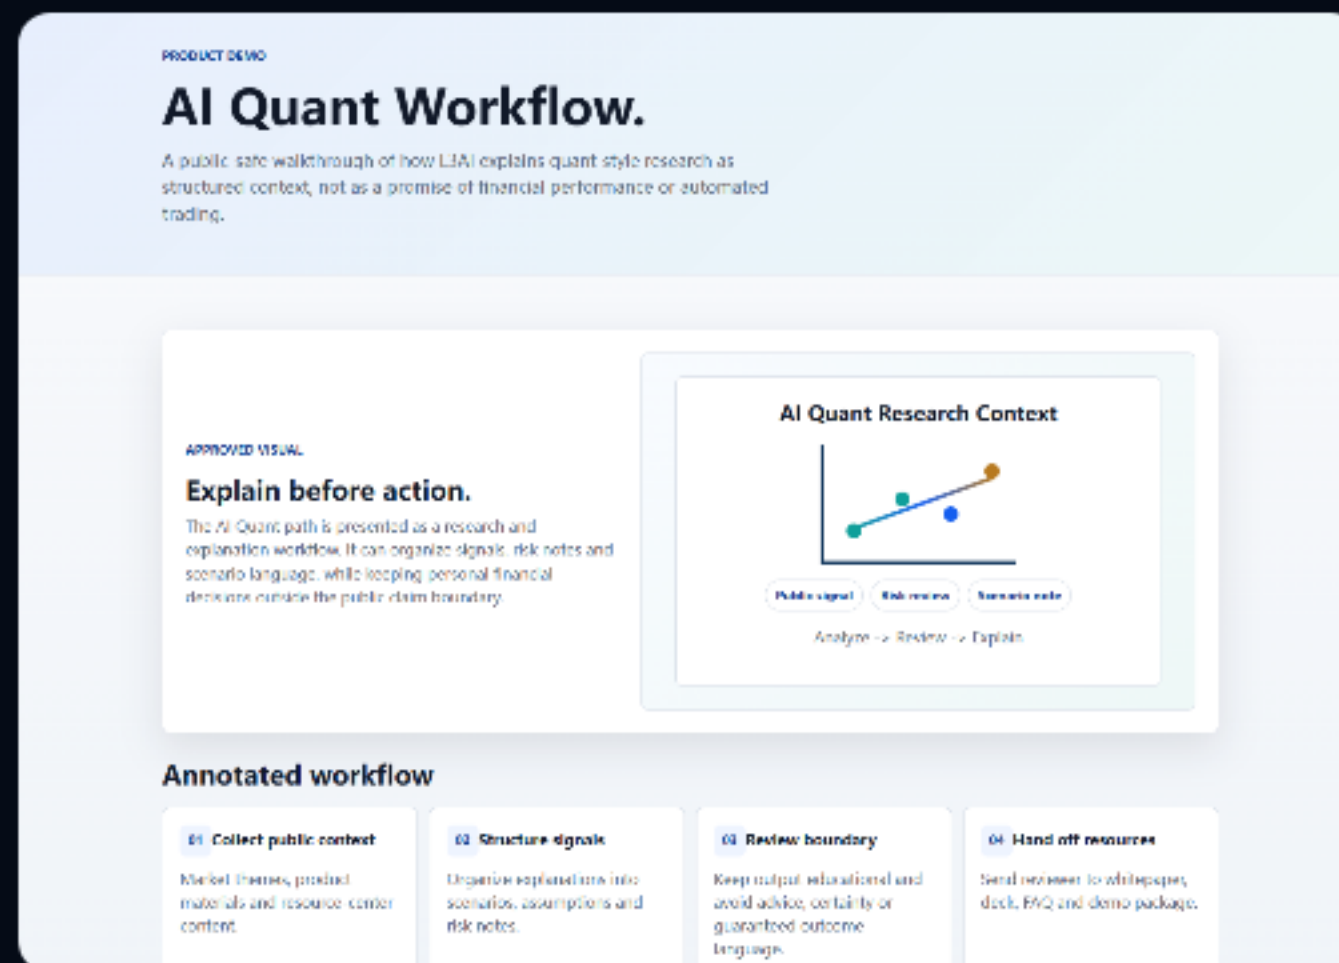

Remove advice, guaranteed outcome and live execution language.

04 Hand off

Route visitors to business model, roadmap or contact when appropriate.

AI Quant is designed to explain before it recommends any direction.

The experience frames signals, assumptions and review notes so users can understand the situation first.

Customer takeaway

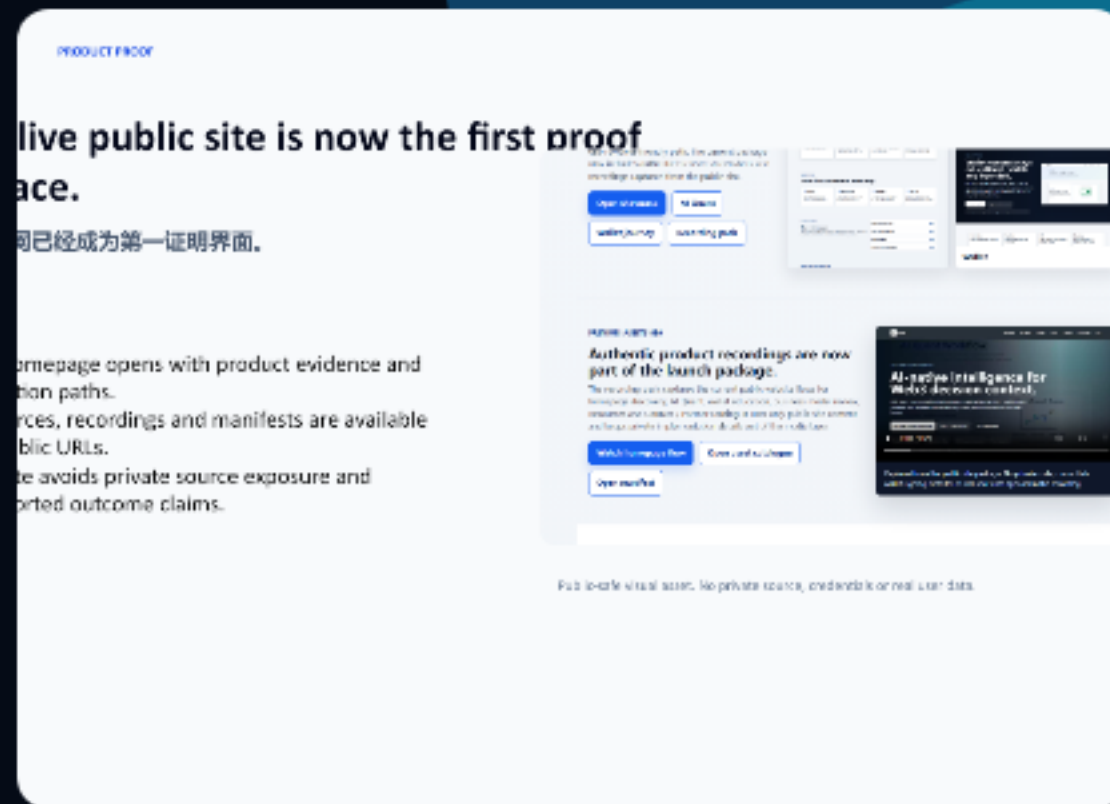

Better context creates better questions.

The intelligence layer becomes more useful when it is repeatable.

Users can return to the same pattern: see the context, read the explanation and decide what to explore next.

Customer takeaway

Consistency is part of trust.

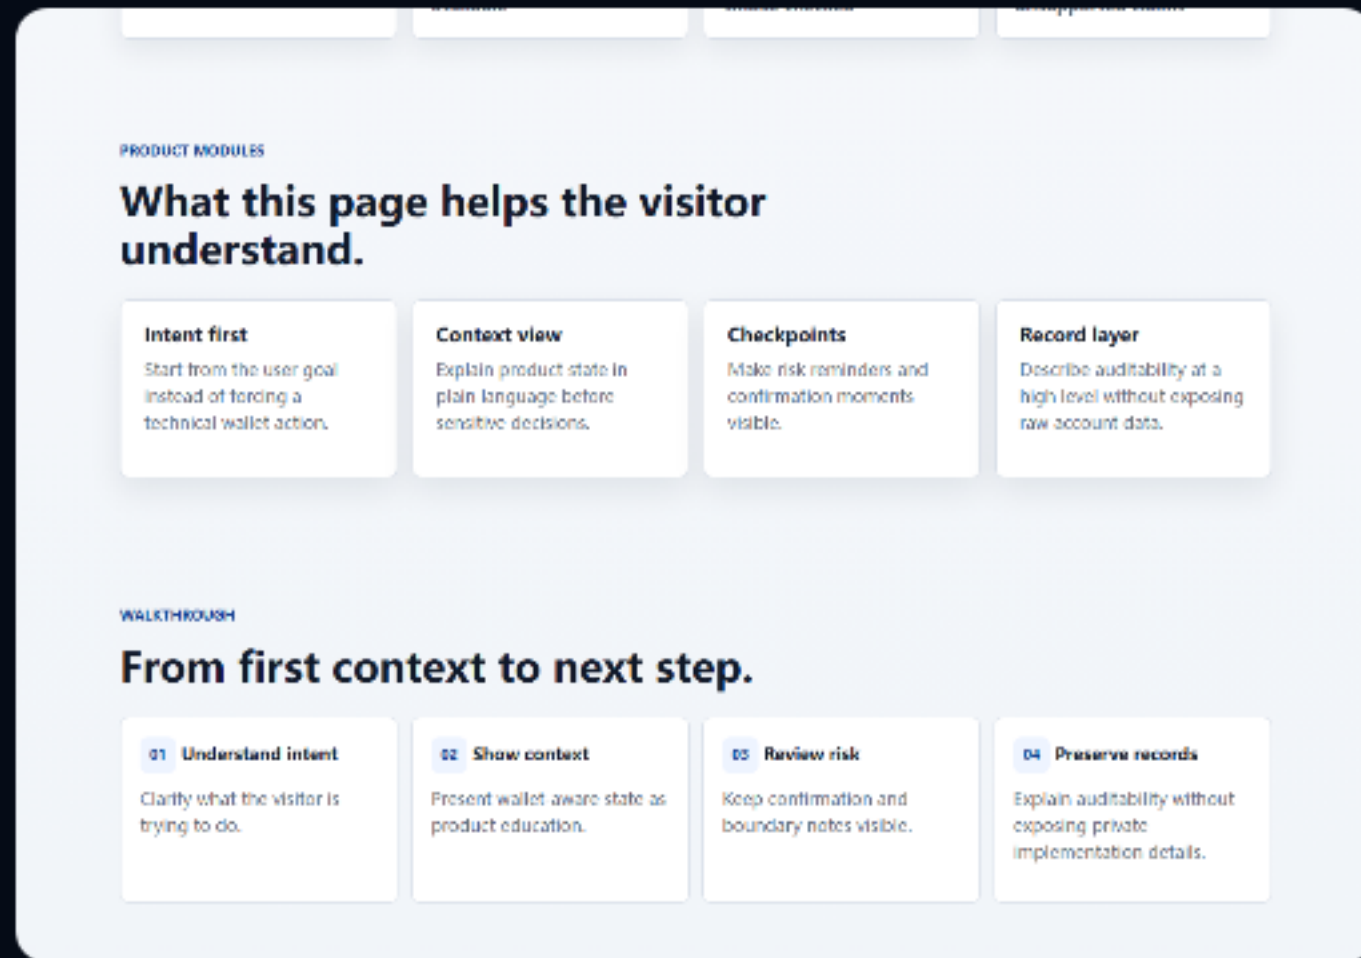

Wallet-aware journeys make participation easier to understand.

Wallet context can feel technical and final. L3AI turns that moment into education, state awareness and careful user guidance.

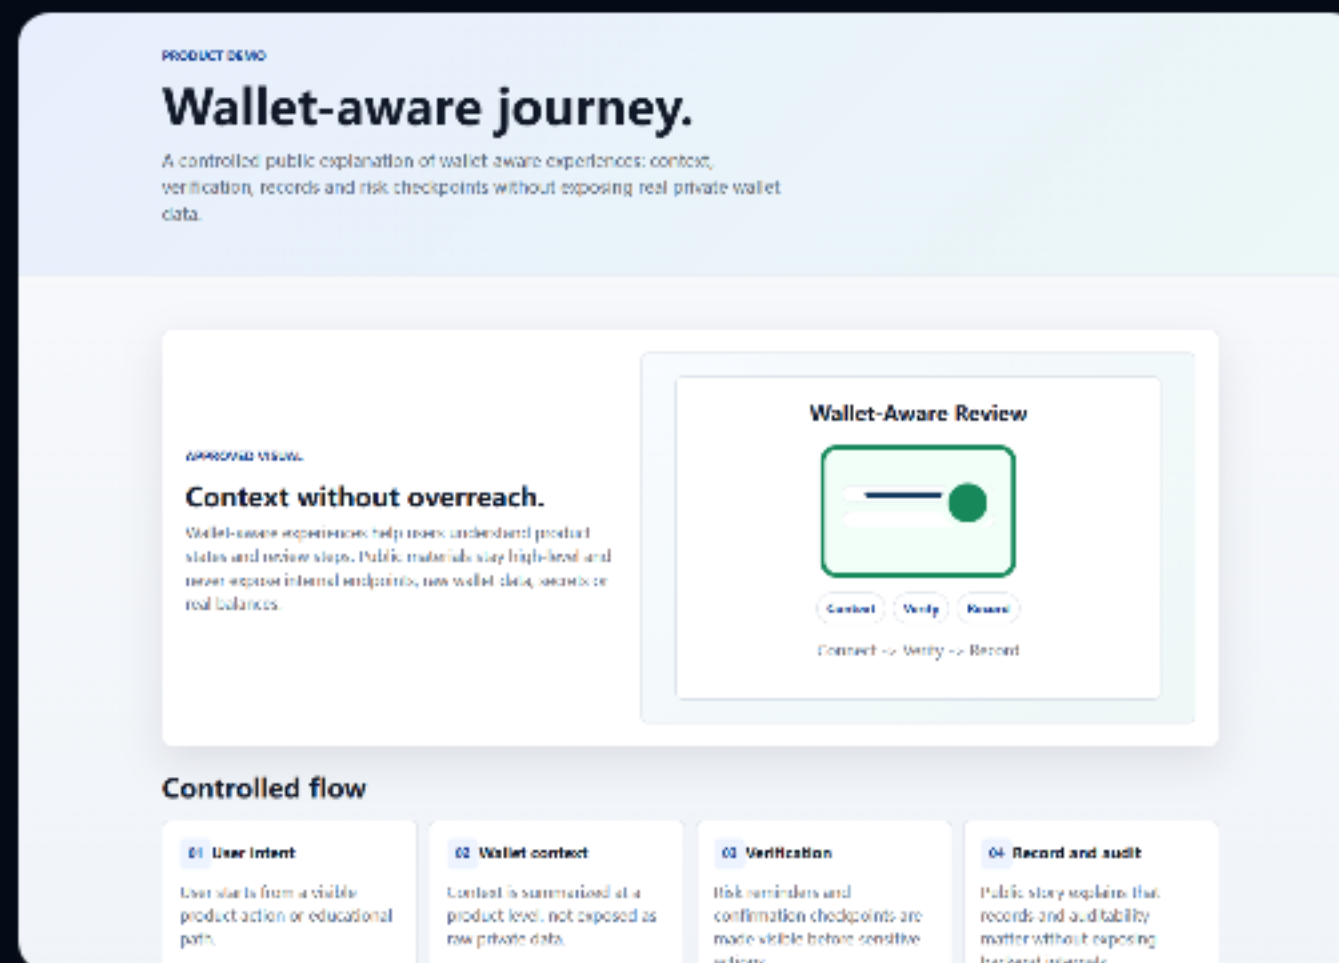

Customer takeaway

The wallet moment should feel understandable.

Wallet context connects identity, access and product state.

The user does not need a lecture. They need a clear explanation of where they are and what each step means.

Customer takeaway

A good product explains the state it creates.

Compute gives the platform a way to organize work behind the scenes.

Compute is the platform layer for structured tasks, AI workflows and repeatable product operations as the ecosystem grows.

Customer takeaway

The system needs a work layer, not just pages.

business story

The platform journey starts with product resources.

The public site gives reviewers a route before asking them to

Start at the product surface

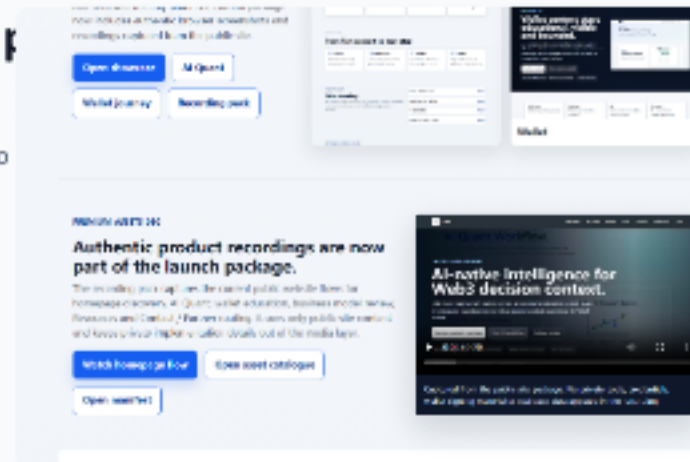

Visitors see the live homepage, product proof and audience paths.

Move into product modules

AI Quant, wallet-aware education, trust and roadmap pages explain the offer.

Open resources only after context

Deck, whitepaper, video and media kit support the story instead of replacing it.

Current

Public screenshot used from the live asset package.

Product Business Deck

Automation should help the user keep momentum.

L3AI can connect learning, review, alerts, content and product flows into repeatable journeys without making the experience feel mechanical.

Customer takeaway

Automation should reduce confusion.

business story

the commercial model monetizes trusted product text.

business loop connects audience, experience, trust and partner review without relying on

that this page helps the visitor understand.

from first context to next step.

Core loop

Product experience creates trust. Trust improves review quality. Review quality supports partner and community growth.

START HERE

Choose your L3AI path.

The current public launch package supports visitor education, media review, partner review, investor review and package verification. Select the route that matches what you need.

Visitors

Start with the public website copy and product positioning. The current material focuses on AI-assisted cancer, wallet-aware education and risk-aware participation.

[Read English](#)

[日本語](#)

[Read FAQ](#)

Investors

Review the public investor deck, narrative PDFs and bilingual overview content. The public site does not add performance promises or investment outcome claims.

[Open investor deck](#)

[Open website PDFs](#)

[Review risk and return boundary](#)

Media

Use the public media kit, press kit, FAQ and image assets that are already present in the launch report.

[Open media and press resources](#)

[Open press kit PDFs](#)

[Open public images and narratives](#)

[Review media language guidelines](#)

Partners

Review product positioning, public copy, FAQ language and launch resources before requesting any non-public material through approved channels.

[Review English website copy](#)

[Review public messaging assets](#)

[Review public FAQ](#)

Contact and Feedback

A formal public business or support contact channel is not present in the current report, but public material review, use the public repository reference until an approved contact name publishes the official channel.

[Open public repository](#)

Product and participation

Membership turns a product visit into an ongoing relationship.

A member journey can connect access, learning, community participation and future product modules in one place.

Customer takeaway

Membership gives the platform memory.

Community learning is the human layer of the product.

Moderated learning, shared explanations and official channels help users understand the platform without relying on hype.

Customer takeaway

The community should teach before it amplifies.

PUBLIC FAQ

L3AI frequently asked questions.

Bilingual answers using the approved public website and press kit language already present in the current launch package.

English

What category does L3AI belong to?

L3AI belongs to the AI-native Web3 financial intelligence category.

What problem does L3AI address?

L3AI helps users make sense of fragmented Web3 information across market context, wallet activity, product modules, ecosystem context and risk signals.

Does L3AI provide financial advice?

No. L3AI provides product information, education, AI-assisted context and on-chain experience. It does not provide personalized investment advice or guarantee outcomes.

What does AI do inside L3AI?

AI helps organize information, summarize context, explain product concepts and reduce information overload. Users remain responsible for reviewing information and making their own decisions.

简体中文

L3AI 属于什么品类?

L3AI 属于 AI 原生 Web3 金融智能品类。

L3AI 解决什么问题?

L3AI 帮助用户理解分散在链上语境、链上活动、产品模块、生态背景和风险信号中的 Web3 信息。

L3AI 提供金融建议吗?

不提供。L3AI 提供产品信息、教育内容、AI 辅助推荐和相关背景体验。它不提供个性化投资建议，也不保证结果。

L3AI 中的 AI 做什么作用?

AI 用于整理信息、总结语境、解释产品概念并减少信息过载。用户对审查信息并做出自己的决策负责。

Alpha Engine 是真实交易引擎吗?

不是。虽然 Alpha Engine 公开披露算法的 paper only 的 AI 量化研究模型和策略。不直接参与交易、管理交易等流程。该模型旨在帮助用户理解其策略性决策结果。

L3AI changes the role of content.

Content is not only marketing. It becomes education, onboarding, product memory and a bridge between users and the platform.

Customer takeaway

The story becomes part of the product.

AI turns Web3 certainty into a guided product journey

Product story, commercial logic and trust boundary for external

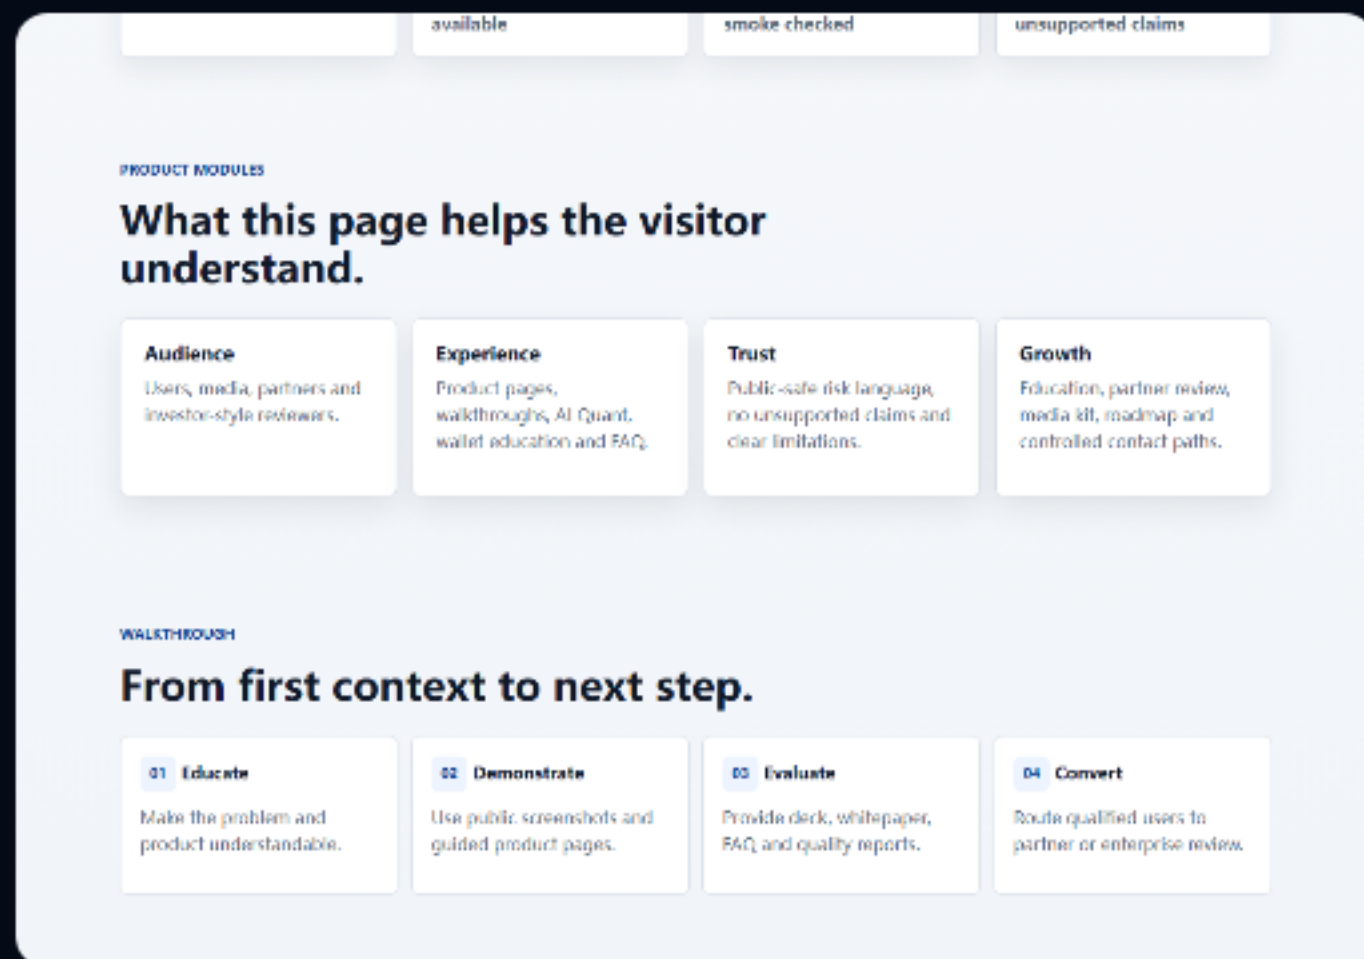

外部评审的产品叙事、商业逻辑与信任边界

What changed

Product replaces a documentation-style roadmap with a product-led business story.

Current public access only

Platform and roadmap

The business model grows from trust, not pressure.

A visitor who understands the product is more likely to become a useful customer, member, partner or community contributor.

Customer takeaway

Clarity improves the quality of growth.

The participation loop is simple enough to remember.

Discover the platform, understand the context, join the right journey, learn with the community and return with better questions.

Learn

Review

Compare

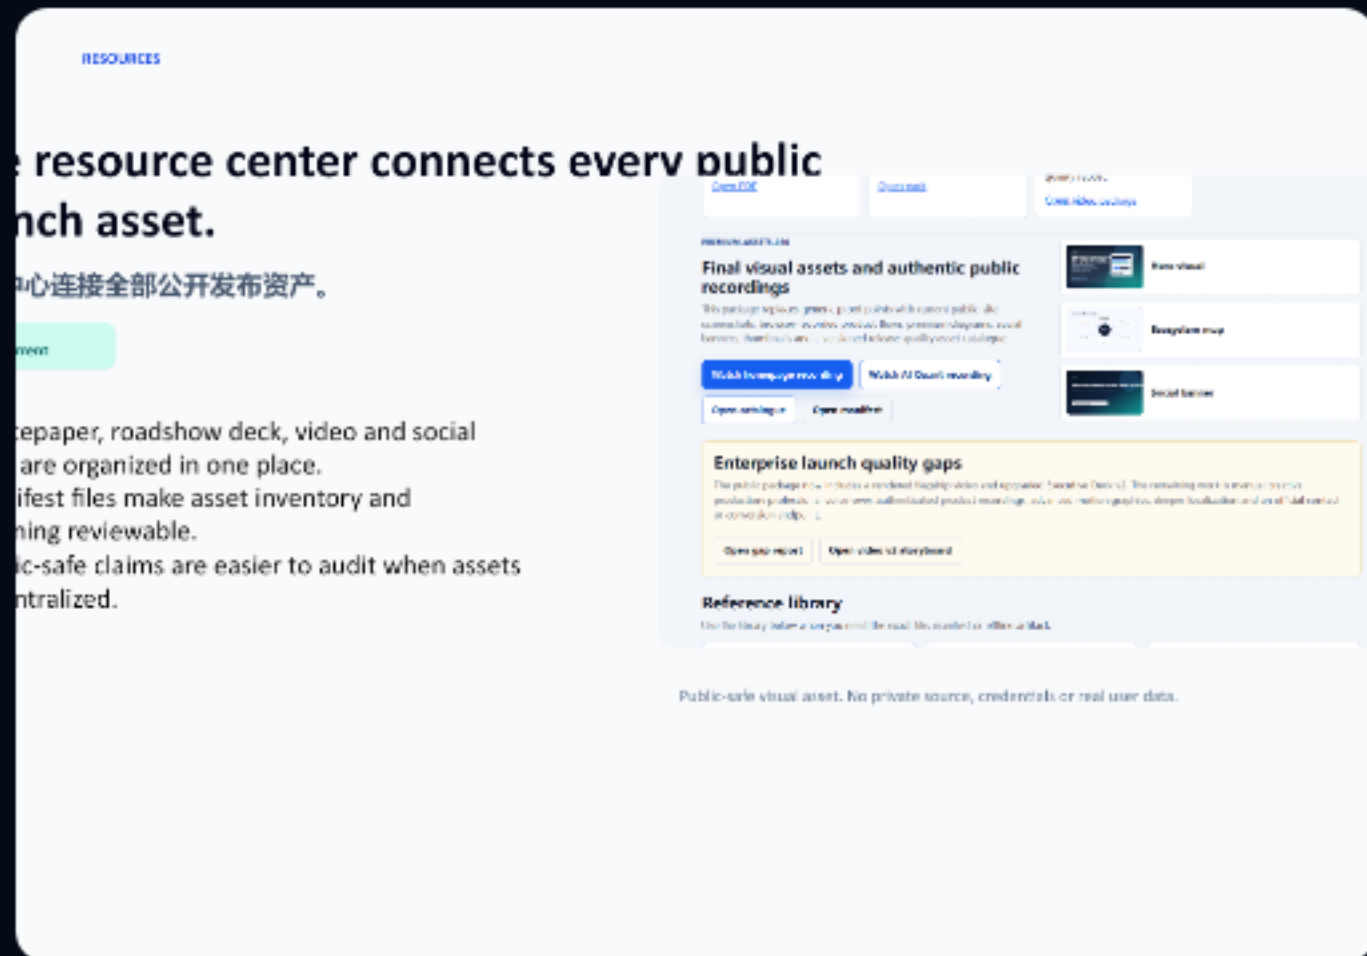

Participate

Return

Customer takeaway

Growth is a loop of understanding.

Platform and roadmap

The Universe roadmap gives the ecosystem room to expand.

Universe is the long-range map for connected experiences, future modules and broader participation across the L3AI environment.

Customer takeaway

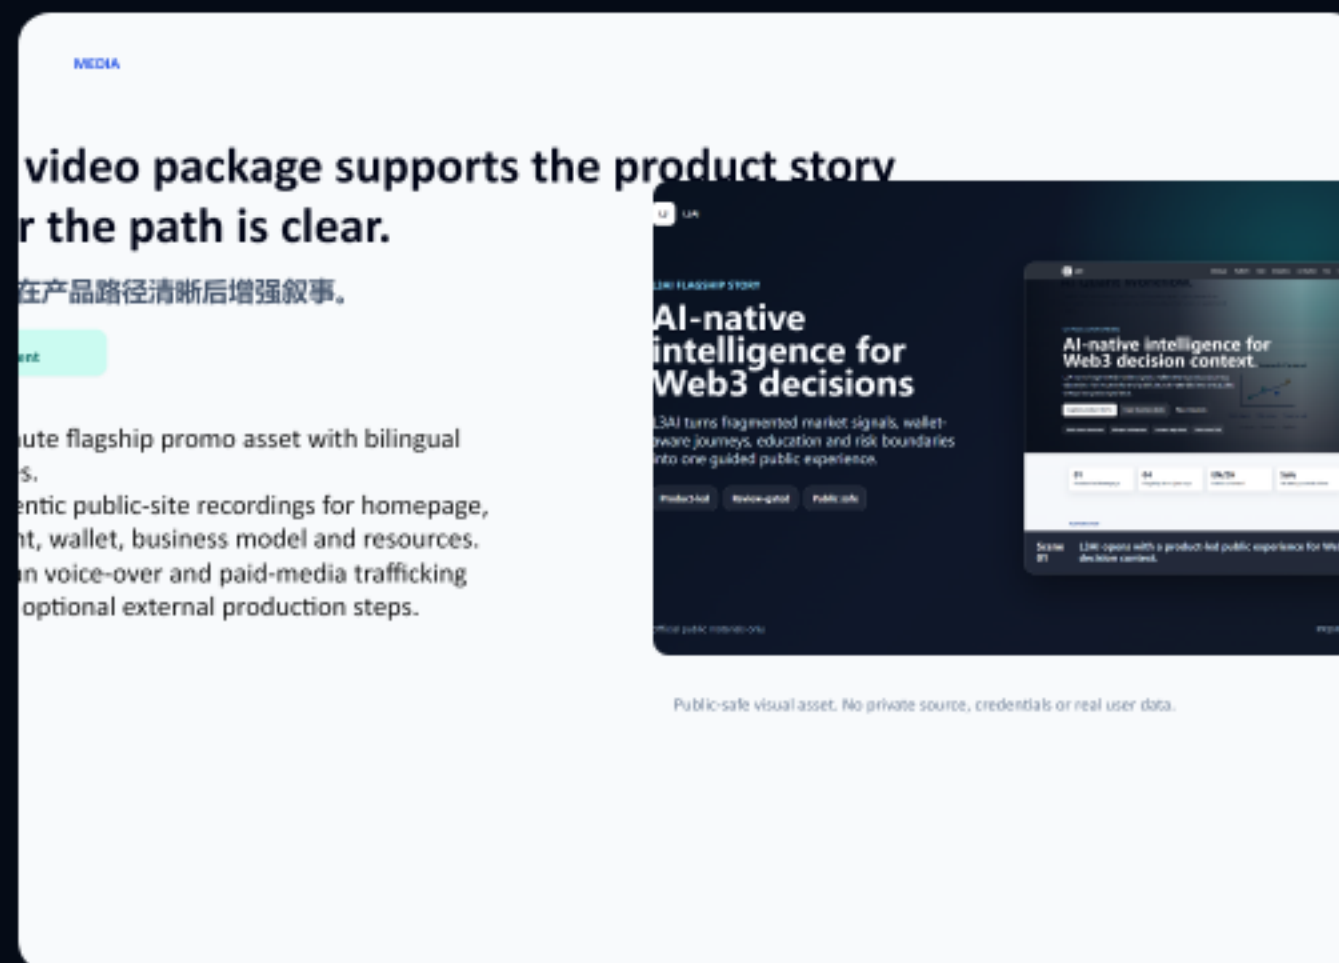

The roadmap should feel like a world, not a backlog.

The roadmap separates what users can use now from what comes next.

Current product surfaces, active content systems and planned expansions are presented as different stages of one platform story.

Customer takeaway

A future is stronger when its stages are honest.

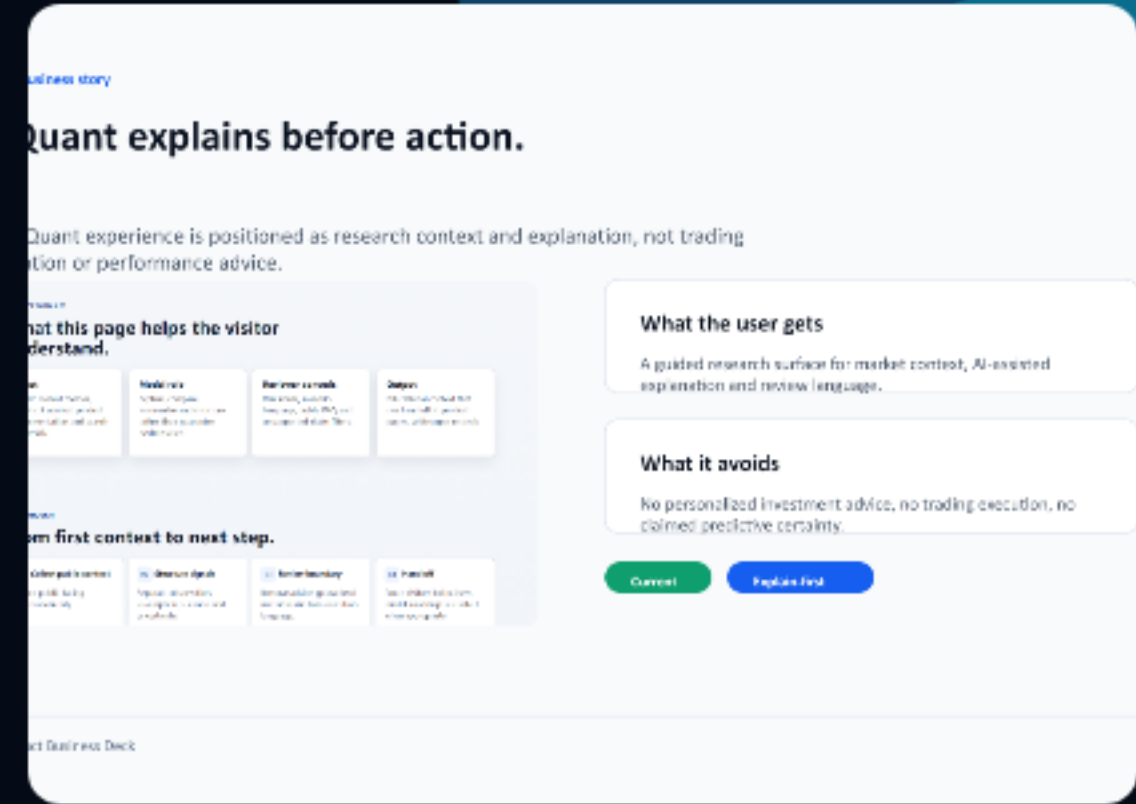

Why now? AI is becoming the interface for complex markets.

When information becomes too fast and fragmented, users look for a layer that can translate complexity into usable context.

Customer takeaway

The timing is about behavior, not hype.

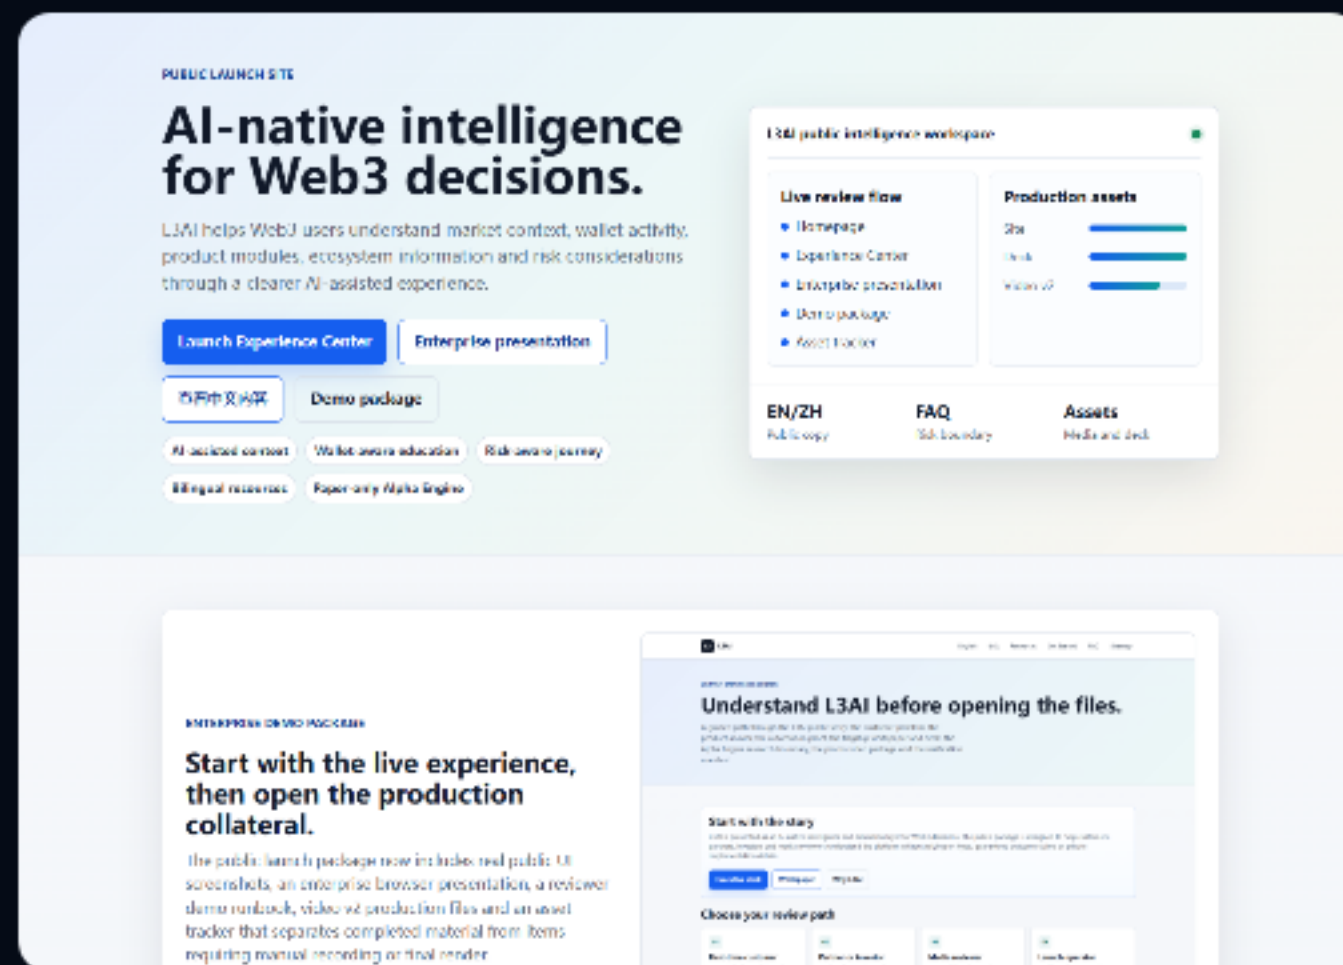

Why now? Web3 participation is becoming more product-led.

Users expect better onboarding, clearer states, safer explanations and official content they can trust.

Customer takeaway

The category is ready for better experience design.

PRODUCT MODULES

What this page helps the visitor understand.

Enterprise review

Use product overview, use cases, deck and trust materials before contact.

Partner review

Use business model, ecosystem and roadmap pages.

Media review

Use media kit, video, screenshots and FAQ.

Operator review

Use manifest, quality report and gap tracker.

WALKTHROUGH

From first context to next step.

01 Prepare context

Review product and use case pages.

02 Collect questions

List business, legal, media or technical review needs.

03 Use approved channel

Send through the externally approved contact route when configured.

04 Keep boundary

Do not submit wallet data, private access material, user data or protected configuration.

Next step

L3AI gives users a place to start.

A first-time user does not need to understand every module on day one. They need a path that tells them where to begin.

Customer takeaway

The best product is easy to enter.

Different audiences can follow the same story in different ways.

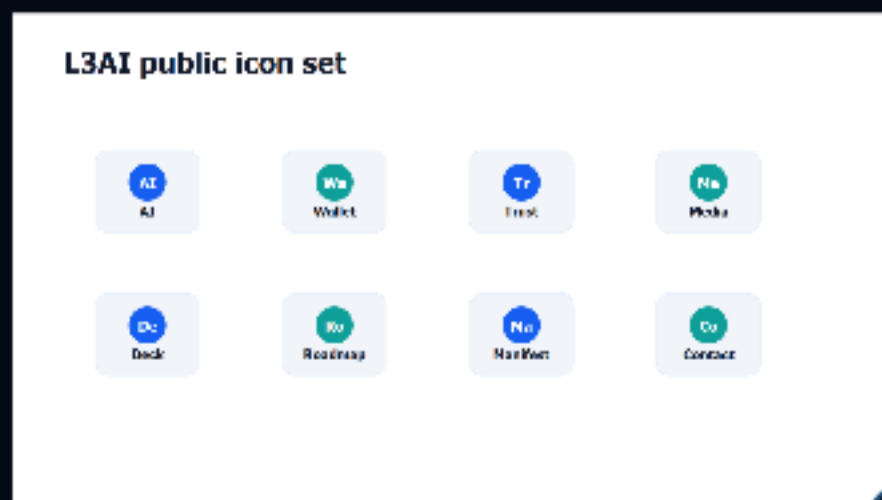

Users, members, partners and media reviewers each need a clear first step without changing the core narrative.

AI Quant

Compute

Wallet

Customer takeaway

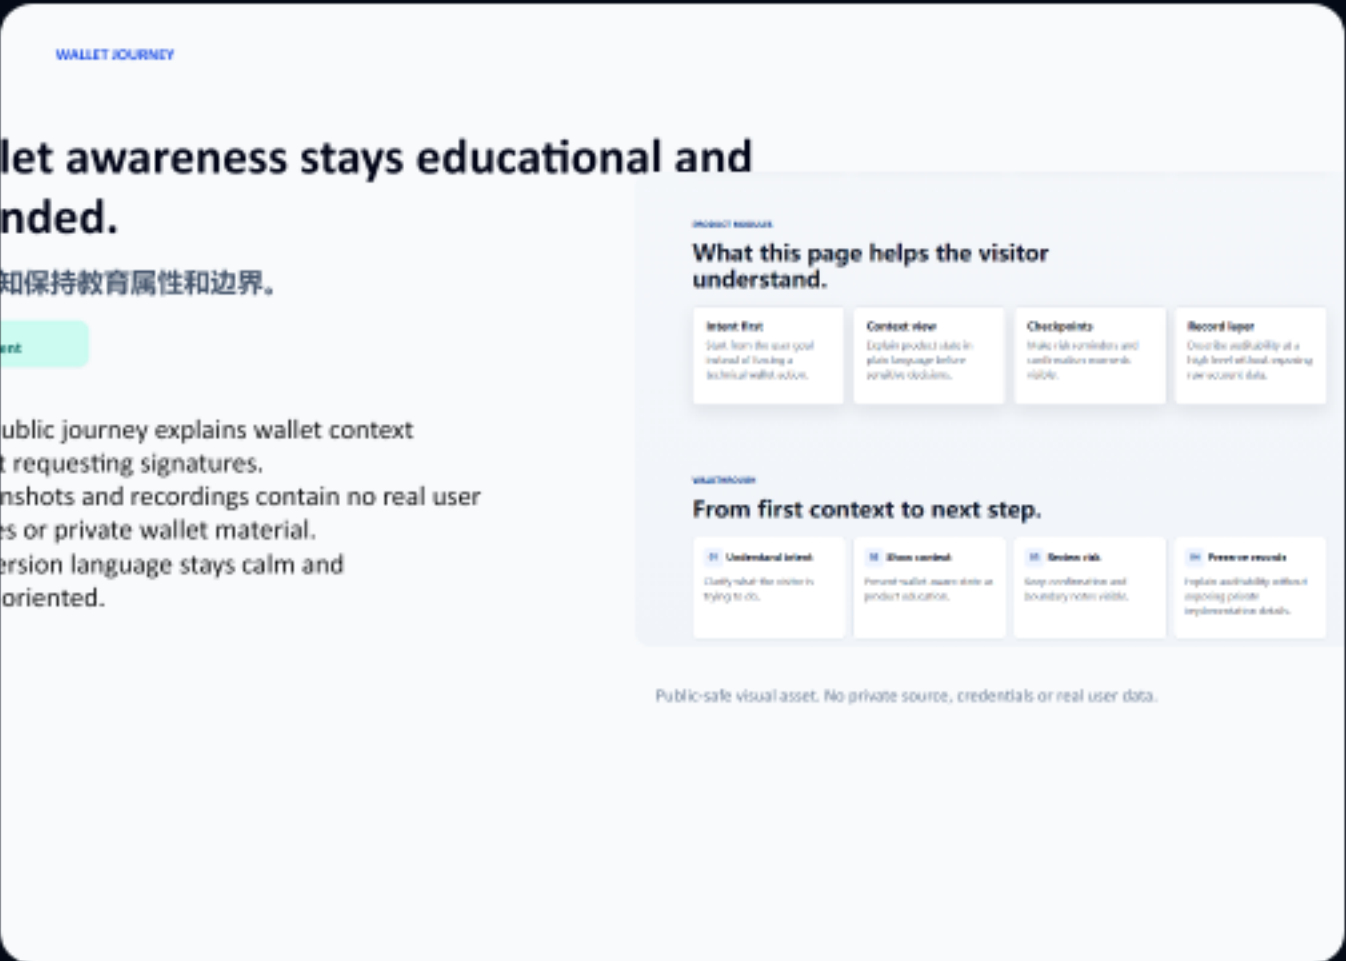

One story can support many entry points.

For partners, L3AI is a product ecosystem in motion.

The partnership conversation starts with user education, product surface, community learning and roadmap fit.

Customer takeaway

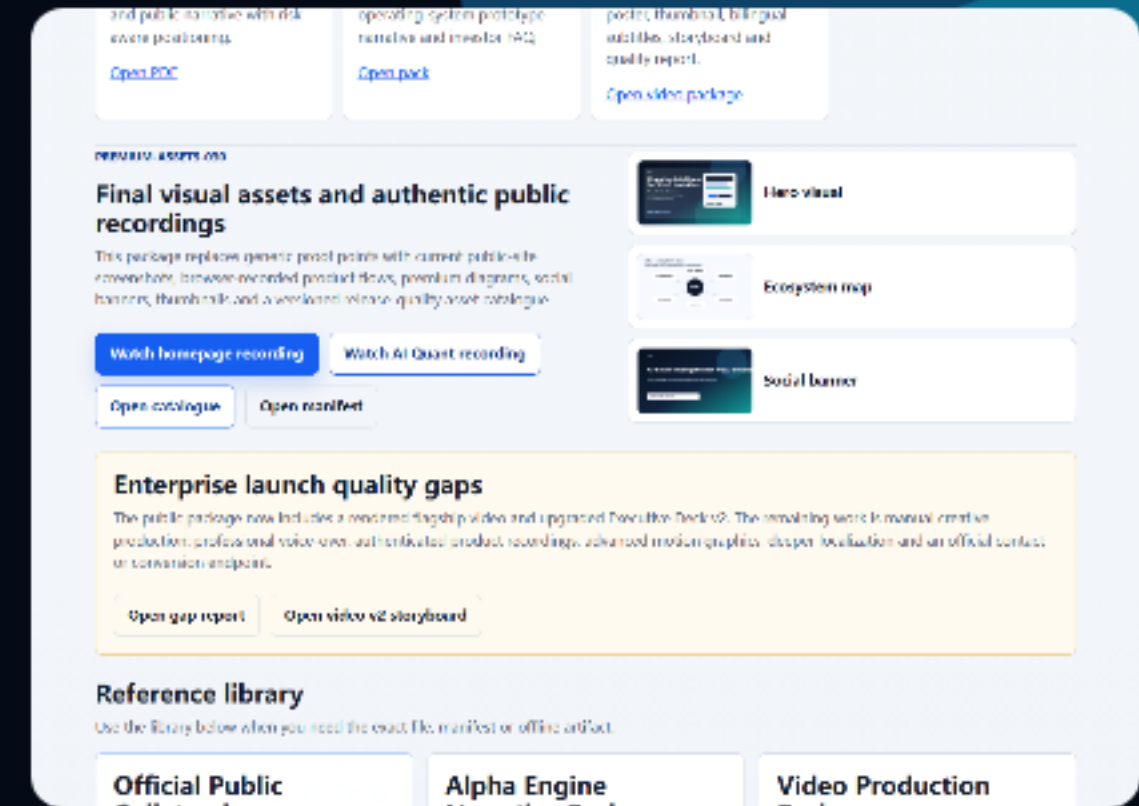

Partnership begins with shared context.

Next step

For users, the next step is simple.

Open the Story Book, explore the platform, learn the product language and choose the path that fits your intent.

Customer takeaway

Start by understanding the platform.

business story

Video and media now follow the product story.

Next promo narrative should move from product problem to user journey, and review CTA.

Open with the user problem

Confusing signals and weak trust slow Web3 decisions.

Show the product path

Homepage, AI Quant, wallet education, resources and partner handoff.

Close with a review action

Use the deck, whitepaper, demo and contact path for controlled external review.

Rewritten narrative included

Product Business Deck

Next step

The story now leads with the user.

This edition brings the platform into a customer narrative: why it matters, how it works and where to begin.

Customer takeaway

The customer should feel the path immediately.

The starting point

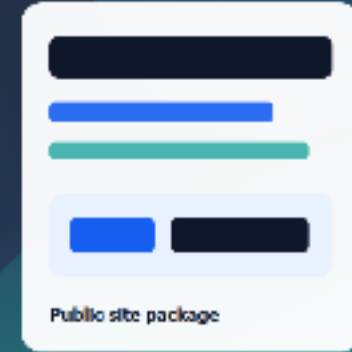

L3AI is building the intelligence layer people can actually follow.

L3AI

AI-native intelligence layer for Web3 decisions.

Product-led public journey
